A DEATH CLOCK .- We have recently been informed of a truly wonderful clock, which is said to belong to a family in Newport. The clock is of simple construction, and belongs to the family of Mr. L—y; but all the efforts of the clockmakers have not been able to make it keep time—consequently, it has been per-mitted to rest in silence. A few hours before the death of Mr. L-y's sister, some short time since, the clock suddenly struck one, after a silence of many months. It thus continued to maintain its silence until another member of the family was prostrated with a fatal malady, when it again struck one and on the following day the child was buried. A year elapsed, when the second child sickened and died. The clock was punctual in sounding one a few hours previous to its death. A third child, a I tile boy 15 months old, was afflicted with serofula, which baffled the skill of his physicians, and died. The clock gave the usual warning, and struck one. It has never failed in sounding the death knell when any of the family in whose possession it now is were about to die. #### GRAY'S PATENT MOLDED COLLARS

Have now been before the public for nearly a year They are universally pronounced the neatest an best fitting collars extant. The upper edge presents a perfect curve, free

from the angles noticed in all other collars. The cravat causes no puckers on the inside of the

turn-down collar; they are as SMOOTH INSIDE AS OUTSIDE, and therefore perfectly free and easy to the neck. The Garotte Collar has a smooth and evenly fin-

ished edge on both sides. These Collars are not simply flat pieces of paper

cut in the ferm of a collar, but are MOLDED AND SHAPED TO FIT THE NECK.

They are made in "Novelty," (or turn-down style;) in every half size from 12 to 17 inches, and in "Eureka," (or Garotte,) from 13 to 17 inches; and packed in "solid sizes" in neat blue cartons. con.aining 100 each; also in smaller ones of ten each-the latter a very handy package for travelers army and navy officers.

BY EVERY COLLAR is stamped
